

Business Announcements

Driver, however, (who has charge of a train of earth-trucks which converts the material for making the lefty parts of new lines) and also remove the soil from the cuttings, saw the engine running without a driver, and with wonderful power, left his siding, and at full speed dashed after the flying locomotive. "This was deperately hazardous, for, had they encountered a train, the world not only have been killed, but, by the presence of his engine, would have rendered the inevitable accident more fearful," the reader, of course, understands that he, was running "up on the 'down' line." Here, however, he caught the earth-truck, and, expending his full strength, he ran to the tender, he reversed both, "he was and ran back to the station—come, 'er, 'er, 'er—less—er swiftly as he could, arriving there safely just in advance of a passenger train."

RESTORING AND REFRESHING

he fatigued and overtaxed mental or physical powers, is probably the distinctive feature of his great perfume, marking it as an absolute necessity for Ladies who wish to retain mind and beauty the beauty of their complexion with the power and freshness of their conversation.

 10. Wang Smith: Wang

...of water, notwithstanding you are
...dressed among pillows, thrown up and down, by
...temperate, deaf to hearing, dumb to speech, and
...terrible to behold, notwithstanding, I say, the
...natural discharges, the divine creation
...shows itself in you after a very wonderful man-
...ner. In you are seen the mighty mysteries of
...an infinite goodness. The Holy Scriptures but
...ways made use of you as the types and
...shadows of some profound sacrament.

"Do you think that, without a mystery thus
...first present, that God Almighty made to man
...of you, O ye fathers? Do you think that,
...without a mystery, among the creatures and
...animals which were appointed for sacrifices,
...you only were excepted? Do you think that
...I think there was nothing more by our Saviour
...Christ, that next to the paschal lamb he took
...so much pleasure in the flesh of you, O ye
...fathers, made use of you as the types and
...of the mouth of a fish? Then all of them so
...many mysterious sacraments, and in a
...more regular manner to the praises of your
...God."

"It is from God, my beloved fathers, that you
...have received life, motion and sense. It
...is he that has given you in compliance with
...your natural inclination, the whole world of
...virtues for your instruction. He has made
...of you, with lodgings, chambers, caverns,
...groves, and such magnificent retreats as are
...not to be met with in the seats of kings, or
...in the palaces of princes, clear, transparent
...brighter than crystal; you can see from its
...deepest bottom everything that passes
...on its surface, and you are eyes of a type or
...an Argus; you are guided by a secret and un-
...derstanding principle, delegating in everything
...that may be beneficial to you, and avoiding
...everything that may be hurtful, you are guided
...by a hidden instinct to preserve yourselves and
...to propagate your species; you obey, in all your
...nations, works, and motions, the dictates and
...regulations of nature, without the least re-
...pugnance or contradiction.

"The colds of winter, and the heats of sum-
...mer, are equally ineffectual in making you
...averse from a life of innocence and purity
...you. Let the earth abound in fruits, or be
...curved with severity, it has no influence on
...your welfare. You live secure, you raise up
...thunder, lightning, and rain, and you have
...no concern in the blossoms of spring or
...in the showings of summer, in the fruits of
...autumn or in the frosts of winter, in the
...seasons, and in the changes of the weather, or
...the varieties of the weather, or the change
...of the seasons.

"In what wonderful mystery, in what wonder-
...ful power, in what amazing providence, did
...God Almighty distinguish you among all the
...species of creatures that perished in the uni-
...versal deluge? You only were saved, and you
...the mischief that had laid waste the whole
...world."

"All this, which I have already told you, ought
...to excite in you the most devout and pious
...worship the Divine Majesty that has done so
...great things for you, granted you such particu-
...lar graces and privileges, and heaped upon
...you so many distinctions and favours. For
...all this you cannot employ your tongues in
...the praises of your benefactor, and are not pro-
...vided with words to express your gratitude,
...mark at least some of the most precious gifts
...which he has bestowed upon you, and give some
...show of gratitude, according to the best of your
...capabilities; express your thanks in the most
...suitable manner, and be most thankful of all
...the benefits he has bestowed upon you."

"He had no sooner done speaking, but behold
...a miracle! The fairs, although they were
...endowed with reason, bowed down their heads
...and devotion, moving their bodies up and down
...with a kind of form, as if they were brought
...before the face of the blessed father, St. Antonio.
...The legends added, that after many heretics,
...who were present at the miracle, had been
...thence by him, the chief cause of benediction
...to the fish, and dismissed them."

SENIOR RIVERS.—Seventy-six years of suffer-
...ing, and containing twenty years of the
...by the P. and O. steamer *Medusa* for the
...of the *Madras* days, *Madras*, *Sept. 26*.
...For many a day a reward of 500,000, had
...been offered to any man who would bring
...talking a message to Marshal Bazaine, and
...bring back his reply. One man very nearly
...performed the feat, but was taken and shot
...at the last moment.

A Frenchwoman has leaved an appeal
...begging 20,000 of her sisters in Germany to come
...at once to Paris, when war was declared
...between the Greeks and the Romans from
...killing "Such olden" gentlemen require
...some patriot of wealth to band him over 100,000
...francs, in order to enable him to make a
...machine capable of destroying the whole
...Prussian army.

CHAMBERS' JOURNAL.—The following incident
...of nerve on the part of an English locomotive
...driver. An engine, which is called "the
...the out of the engine, and the engine
...machinery was so purposely deranged, that
...it could not move in either direction. From
...this having been imperceptibly done, the
...under way, very slowly at first, but the regula-
...tor being jerked once, it soon attained a terrible
...speed, which was all the more alarming as the
...driver on the down line, and was running
...toward London. The effect of this, of course,
...would be that it must sooner or later run head
...long to the first down train, and there
...be a collision of great magnitude, or a colli-
...sion that had ever yet taken place. A ballast-
...driver, however, (one who has charge of a train
...of earth-trucks which are used in the work
...making the lofty and new line and also re-
...move the soil from the cuttings), saw the engine
...running without a driver, and with wonderful
...speed, and this he saw, and at first he
...after the flying locomotive. This was de-
...perately hazardous, for, had they encountered a train,
...the world would not only have been killed, but, by the
...pressure of his steam, he would have been
...inevitable accident more fearful—the reader,
...of course, understands that he was running "up
...on the down" line. However, he out-
...ran the train, and, after having run on for
...on to the tender, he reversed the engine, and
...run back to the station, and, "less suc-
...cessfully as he could, arriving there safely, just
...in advance of a passenger train.
